

# Symposium for the 30<sup>th</sup> Anniversary of the Montreal Protocol

19 – 20 September 2017  
Fondation Del Duca, Paris, France

*From the safeguard of the ozone layer to the  
protection of the Earth climate*

Hailed as an example of exceptional international cooperation for the protection of the ozone layer, the Montreal Protocol became in 2010 the first international treaty to achieve universal ratification. In October 2016, the Kigali amendment was added to the Protocol for controlling the growth of the substitutes of ozone depleting substances, some of which are powerful greenhouse gases and thereby mitigating their impact on the Earth's climate.

## Symposium themes:

- The history of atmospheric ozone and the discovery of the ozone hole
- Ozone layer science: historical and present perspectives
- The impact of ozone depletion on climate
- Environmental effects of the ozone depletion
- The industry role in the Montreal Protocol and the search for substitutes
- The impact of hydrofluorocarbons on climate and the Kigali amendment
- Geoengineering and the future ozone layer
- Implementation and governance of the Montreal Protocol
- Ozone and climate controversies
